Members \$25  
Non Members \$35

**Andrew Redfern**  
Family History Educator

## ENHANCING GENEALOGY WITH AI

Learn how artificial intelligence can be used as an effective tool with your research and family history work. Live demonstrations will show you how to harness the power of these technologies while being aware of security, bias and privacy.

## DISCOVERING FAMILY HISTORY

From convicts and murderers to priests and travelling musicians, every family has rogues, saints and heroes. Hear some of the stories from Andrew's own research & learn valuable tips and strategies for uncovering your own family history, including where to go to for particular records.

*Andrew is an enthusiastic family historian and highly sought after speaker, having delivered presentations globally over many years. His presentations are entertaining and informative while also giving attendees practical examples to pursue their own research.*
